Subject Index

Canadian Journal of Soil Science, Volume 82, 2002

Acer sacxcharum
soil fertility and nutrient status of sugar maples in decline, 23
Adsorption
P adsorption in a constructed wet land soil, 97
Aggregate stability
soil salinization from saline-sodic irrigation water, 297
Aggregation, soil
quantitative soil macroaggregation model, 181
Agricultural economics
manure and lime improve crop production on acid soil, 227
Air permeability
soil physical properties under long-term manure application, 287
Alfisol
^{13}C CP/MAS-NMR spectra of organic matter in Spanish soils, 403
Aluminium, extractable
stabilization of organic matter by aluminium, 265
Ammonia, atmospheric
ecotoxicity threshold for atmospheric ammonia, 341
Ammonia toxicity
ecotoxicity threshold for atmospheric ammonia, 341
Ammonium
preserving ammonium in agricultural runoff samples, 439
soil sampling strategies in raspberry fields, 355
Analyse régionale
exploration du SPI à l'aide d'une analyse régionale, 115
Anion exchange membrane
availability of N in manure with different C:N ratios, 219
Arbuscular mycorrhizal fungi
mycorrhizae and K, Ca and Mg maize nutrition, 271
Arthropod
soil fauna and forest cutting, 105
Atmospheric ammonia
ecotoxicity threshold for atmospheric ammonia, 341
Available N
impact of organic amendment on CO_2 and N_2O emissions, 395
Barley
bootstage nutrient concentrations, 33
impact of potato-cereal rotations on nitrate leaching, 469
Barley growth
controlled-release P fertilizer, 201
Bioavailability
bioavailability of heavy metals in amended soils, 433
Biodegradation
dissipation of estrogenic hormones in soils, 335
Biological activity index
soil fertility and nutrient status of sugar maples in decline, 23
Biosolid
trace metal extractability in soils, 323
Boot stage
boot-stage nutrient concentrations, 33
Boron, exchangeable
boron fractions in soils, 173
Boron fractionation
boron fractions in soils, 173
Bromegrass
N source and application time on bromegrass influence soil C and N, 211
Bulk density
bulk density effects on soil microbial populations and enzyme activities, 147
soil physical properties under long-term manure application, 287
wapiti impacts on pastures, 1

Cadmium
trace metal extractability in soils, 323
Caesium-137
use of caesium-137 to investigate soil erosion, 423
Calcium carbonate
magnetic susceptibility of Gleysolic and Chernozemic soils, 191
Calcium, uptake of
mycorrhizae and K, Ca and Mg maize nutrition, 271
Canola
tillage, crop rotation and N fertilizer requirement, 165
Canola production
manure and lime improve crop production on acid soil, 227
Carbon
near-infrared spectroscopic analysis of C and N, 413
Carbon-13 CP/MAS-NMR spectra
^{13}C CP/MAS-NMR spectra of organic matter in Spanish soils, 403
Carbon dioxide
impact of organic amendment on CO_2 and N_2O emissions, 395
peat oxidation in an abandoned cutover peatland, 279
Carbon dioxide emissions
effect of fertility on soil C flux, 155
Carbon inputs in crop residues
effect of fertility on soil C flux, 155
Carbon:nitrogen ratio
availability of N in manure with different C:N ratios, 219
Carbon sequestration
effect of fertility on soil C flux, 155
soil C gains in Brown soil zone, 481
Cattle manure
manure and lime improve crop production on acid soil, 227
Cereal
crop production trends on the prairies, 45
Cervus elaphus
wapiti impacts on pastures, 1
Chernozem
magnetic susceptibility of Gleysolic and Chernozemic soils, 191
Clearcutting
soil fauna and forest cutting, 105
Clover, red
tillage, crop rotation and N fertilizer requirement, 165
Compaction, soil
bulk density effects on soil microbial populations and enzyme activities, 147
temporal trends in soil properties, 499
Compensation point
ecotoxicity threshold for atmospheric ammonia, 341
Compost
boot-stage nutrient concentrations, 33
impact of organic amendment on CO_2 and N_2O emissions, 395

Controlled-release P fertilizer, 201
Copper
  trace metal extractability in soils, 323
Corn
  bulk density effects on soil microbial populations and enzyme activities, 147
  corn residue decomposition, 127
  N_2 fixation in soybeans and N credit for a following crop, 139
Cover crop
  manure effects on runoff, sediment, and nutrient transport, 445
Crop residue decomposition
  crop and soil N status, 489
  corn residue decomposition, 127
Crop response
  field-scale N fertilizer recommendations, 59
Crop yield
  deep ripping effects on Solonetzic soil, 259
Cutover peatland
  wind erosion in milled peatlands, 85

Deflation
  amelioration of degraded soils, 375
Degradation, soil
  amelioration of degraded soils, 375
Dendrochronology
  peat oxidation in an abandoned ` cutover peatland, 279
Dieback,
  soil fertility and nutrient status of sugar maples in decline, 23
Discordance
  exploration du SPI à l'aide d'une analyse régionale, 115
Denitrification and decomposition model
  testing the DNDC model, 365
Dynamics of shrinkage cracks
  shrinkage cracks bypass flow, 65
Dystric Albeluvisols
  soil erosion severity in Lithuania, 311

Economics, agricultural
  manure and lime improve crop production on acid soil, 227
Ecosystem restoration
  amelioration of degraded soils, 375
Electrical conductivity
  deep ripping effects on Solonetzic soil, 259
Endocrine disrupting chemical
  dissipation of estrogenic hormones in soils, 335
Environment
  resins in soil research, 9
Enzymes, soil
  bulk density effects on soil microbial populations and enzyme activities, 147
Erosion
  hay mulching for soil conservation in potato production, 249
  use of caesium-137 to investigate soil erosion, 423
  wind erosion in milled peatlands, 85
Erosion severity
  soil erosion severity in Lithuania, 311
17β-estradiol
  dissipation of estrogenic hormones in soils, 335
17α-ethynylestradiol
  dissipation of estrogenic hormones in soils, 335
Exchangeable B
  boron fractions in soils, 173
Extractable Al and Fe
  stabilization of organic matter by aluminium, 265
Extractable B
  boron fractions in soils, 173
Extraradicular hyphae
  mycorrhizae and K, Ca and Mg maize nutrition, 271

Fertilizer
  bootstage nutrient concentrations, 33
  controlled-release P fertilizer, 201
Fertilizer recommendation
  field-scale N fertilizer recommendations, 59
Field pea
  tillage, crop rotation and N fertilizer requirement, 165
Forage
  trace metal extractability in soils, 323
Forest soil
  soil fertility and nutrient status of sugar maples in decline, 23
Frozen soil
  soil texture and melt infiltration in frozen soils, 75
Fumigation, soil
  mycorrhizae and K, Ca and Mg maize nutrition, 271

Grain protein
  crop and soil N status, 489
Gleysol
  magnetic susceptibility of Gleysolic and Chernozemic soils, 191
Greenhouse gas
  testing the DNDC model, 365

Hay mulching
  hay mulching for soil conservation in potato production, 249
Heavy metals
  bioavailability of heavy metals in amended soils, 433
  trace metal extractability in soils, 323
Hétérogénéité
  exploration du SPI à l'aide d'une analyse régionale, 115
Hormone
  issipation of estrogenic hormones in soils, 335

Incubation
  impact of organic amendment on CO_2 and N_2O emissions, 395
Indicateur
  exploration du SPI à l'aide d'une analyse régionale, 115
Infiltration
  soil salinization from saline-sodic irrigation water, 297
  soil texture and melt infiltration in frozen soils, 75
Ion exchange resin
  resins in soil research, 9
Irregular wetting fronts
  shrinkage cracks bypass flow, 65

Langmuir
  P adsorption in a constructed wetland soil, 97
Light fraction
  soil C gains in Brown soil zone, 481
Light fraction C and N
  N source and application time on bromegrass influence soil C and N, 211
Lime
  manure and lime improve crop production on acid soil, 227
Litterbag
  corn residue decomposition, 127
Lysimeter
  impact of potato-cereal rotations on nitrate leaching, 469

Macroaggregate turnover
  quantitative soil macroaggregation model, 181

Magnesium, uptake of
mycorrhizae and K, Ca and Mg maize nutrition, 271
Magnetic susceptibility
magnetic susceptibility of Gleysolic and Chernozemic soils, 191
Maize
bulk density effects on soil microbial populations and enzyme activities, 147
corn residue decomposition, 127
mycorrhizae and K, Ca and Mg maize nutrition, 271
Manure
availability of N in manure with different C:N ratios, 219
impact of organic amendment on CO_2 and N_2O emissions, 395
manure and lime improve crop production on acid soil, 227
Manure management
effect of liquid swine manure application in Saskatchewan, 457
Manure rate
soil physical properties under long-term manure application, 287
Maple
soil fertility and nutrient status of sugar maples in decline, 23
Mediterranean soils
^{13}C CP/MAS-NMR spectra of organic matter in Spanish soils, 403
Microbial population
bulk density effects on soil microbial populations and enzyme activities, 147
Mineral concentration
bootstage nutrient concentrations, 33
Mineral N
N_2 fixation in soybeans and N credit for a following crop, 139
Mineralization
availability of N in manure with different C:N ratios, 219
Model
quantitative soil macroaggregation model, 181
Moisture content
wapiti impacts on pastures, 1
Mollisol
^{13}C CP/MAS-NMR spectra of organic matter in Spanish soils, 403
Molybdenum
trace metal extractability in soils, 323
Moments L
exploration du SPI à l'aide d'une analyse régionale, 115

Near-infrared spectroscopy
near-infrared spectroscopic analysis of C and N, 413
Nitrate
soil sampling strategies in raspberry fields, 355
Nitrate leaching
impact of potato-cereal rotations on nitrate leaching, 469
soil sampling strategies in raspberry fields, 355
Nitrification
soil sampling strategies in raspberry fields, 355
Nitrogen
field-scale N fertilizer recommendations, 59
N source and application time on bromegrass influence soil C and N, 211
near-infrared spectroscopic analysis of C and N, 413
tillage, crop rotation and N fertilizer requirement, 165
Nitrogen and phosphorus fertilization
effect of fertility on soil C flux, 155
Nitrogen availability
availability of N in manure with different C:N ratios, 219
crop and soil N status, 489
effect of liquid swine manure application in Saskatchewan, 457
Nitrogen balance
impact of potato-cereal rotations on nitrate leaching, 469
Nitrogen credit
N_2 fixation in soybeans and N credit for a following crop, 139
Nitrogen fixation
N_2 fixation in soybeans and N credit for a following crop, 139
Nitrogen fractions, soil
crop and soil N status, 489
Nitrogen mineralization
crop and soil N status, 489
Nitrogen source
N source and application time on bromegrass influence soil C and N, 211
Nitrogen use efficiency
effect of liquid swine manure application in Saskatchewan, 457
Nitrous dioxide
impact of organic amendment on CO_2 and N_2O emissions, 395
Nitrous oxide
testing the DNDC model, 365
No-till
corn residue decomposition, 127
Northern hardwood
soil fauna and forest cutting, 105
Nutrient load
manure effects on runoff, sediment, and nutrient transport, 445
Nutrient loss
hay mulching for soil conservation in potato production, 249

Oak Ridges Moraine
amelioration of degraded soils, 375
Oilseed
crop production trends on the prairies, 45
Organic matter composition
^{13}C CP/MAS-NMR spectra of organic matter in Spanish soils, 403
Organic matter, soil
soil C gains in Brown soil zone, 481
Organic matter stabilization
stabilization of organic matter by aluminium, 265
Organic residue
hay mulching for soil conservation in potato production, 249
Organic soil
peat oxidation in an abandoned cutover peatland, 279
Organically bound B
boron fractions in soils, 173
Oxidation
peat oxidation in an abandoned cutover peatland, 279

Particle size separates
stabilization of organic matter by aluminium, 265
Pasture production
wapiti impacts on pastures, 1
Pea, field
tillage, crop rotation and N fertilizer requirement, 165
Peat
wind erosion in milled peatlands, 85
Peat extraction
peat oxidation in an abandoned cutover peatland, 279
Peatland
peat oxidation in an abandoned cutover peatland, 279
Pedology
soil erosion severity in Lithuania, 311

Penetration resistance
soil physical properties under long-term manure application, 287
wapiti impacts on pastures, 1
pH
short-term stability of soil test phosphorus, 239
manure and lime improve crop production on acid soil, 227
Phosphorus
P adsorption in a constructed wet land soil, 97
Phosphorus levels, soil
mycorrhizae and K, Ca and Mg maize nutrition, 271
Phosphorus uptake
controlled-release P fertilizer, 201
Physical properties
soil physical properties under long-term manure application, 287
Pig manure
impact of organic amendment on CO_2 and N_2O emissions, 395
Pig slurry
impact of potato-cereal rotations on nitrate leaching, 469
Plantation (red pine)
amelioration of degraded soils, 375
Potassium, uptake of
mycorrhizae and K, Ca and Mg maize nutrition, 271
Potato
impact of potato-cereal rotations on nitrate leaching, 469
Priority substance list
ecotoxicity threshold for atmospheric ammonia, 341
Pulse
crop production trends on the prairies, 45

Raspberry
soil sampling strategies in raspberry fields, 355
Red clover
tillage, crop rotation and N fertilizer requirement, 165
Relay crop
manure effects on runoff, sediment, and nutrient transport, 445
Resin
resins in soil research, 9
Roughness length
wind erosion in milled peatlands, 85
Rubus idaeus
soil sampling strategies in raspberry fields, 355
Runoff
manure effects on runoff, sediment, and nutrient transport, 445
Runoff sample
preserving ammonium in agricultural runoff samples, 439

Salamander
soil fauna and forest cutting, 105
Saline-sodic irrigation water
soil salinization from saline-sodic irrigation water, 297
Salinity, soil
soil salinization from saline-sodic irrigation water, 297
Sample preservation
preserving ammonium in agricultural runoff samples, 439
Sampling strategy
use of caesium-137 to investigate soil erosion, 423
Saturation
P adsorption in a constructed wetland soil, 97
Sécheresse
exploration du SPI à l'aide d'une analyse régionale, 115
Sediment composition
hay mulching for soil conservation in potato production, 249
Seeded area
crop production trends on the prairies, 45
Selective cutting
soil fauna and forest cutting, 105
Sewage sludge
bioavailability of heavy metals in amended soils, 433
Shrew
soil fauna and forest cutting, 105
Silage corn
manure effects on runoff, sediment, and nutrient transport, 445
Slope steepness
soil erosion severity in Lithuania, 311
Snowmelt
soil texture and melt infiltration in frozen soils, 75
Snowmelt erosion
use of caesium-137 to investigate soil erosion, 423
Sodicity, soil
soil salinization from saline-sodic irrigation water, 297
Sodium adsorption ratio
deep ripping effects on Solonetzic soil, 259

Soil aggregation
quantitative soil macroaggregation model, 181
Soil chemical properties
deep ripping effects on Solonetzic soil, 259
Soil crusts
wind erosion in milled peatlands, 85
Soil degradation
amelioration of degraded soils, 375
Soil loss
hay mulching for soil conservation in potato production, 249
Soil model
testing the DNDC model, 365
Soil monitoring
near-infrared spectroscopic analysis of C and N, 413
temporal trends in soil properties, 499
Soil research
resins in soil research, 9
Soil test phosphorus
short-term stability of soil test phosphorus, 239
Soil water
field-scale N fertilizer recommendations, 59
Solonetzic soil
deep ripping effects on, 259
Soluble B
boron fractions in soils, 173
Soybean
N_2 fixation in soybeans and N credit for a following crop, 139
Spanish soils
^{13}C CP/MAS-NMR spectra of organic matter in Spanish soils, 403
Spatial stability
short-term stability of soil test phosphorus, 239
Spatial variability
field-scale N fertilizer recommendations, 59
Spring wheat
effect of fertility on soil C flux, 155
Stability, soil
wind erosion in milled peatlands, 85
Strip clearcutting
soil fauna and forest cutting, 105
Subsoiling
deep ripping effects on Solonetzic soil, 259
Summer fallow
crop production trends on the prairies, 45
effect of fertility on soil C flux, 155
soil C gains in Brown soil zone, 481

Sunflower
bioavailability of heavy metals in amended soils, 433
Suspended solids
manure effects on runoff, sediment, and nutrient transport, 445
Swine manure
effect of liquid swine manure application in Saskatchewan, 457

Temperature
soil physical properties under long-term manure application, 287
Temporal change
temporal trends in soil properties, 499
Temporal stability
short-term stability of soil test phosphorus, 239
Testing
testing the DNDC model, 365
Texture
soil texture and melt infiltration in frozen soils, 75
Tillage
corn residue decomposition, 127
tillage, crop rotation and N fertilizer requirement, 165
Tillage intensity
crop and soil N status, 489
Topography
near-infrared spectroscopic analysis of C and N, 413
Total organic C and N
N source and application time on bromegrass influence soil C and N, 211
Tracer
quantitative soil macroaggregation model, 181

Wapiti
impacts of on pastures, 1
Water erosion
hay mulching for soil conservation in potato production, 249
use of caesium-137 to investigate soil erosion, 423
Water quality
soil salinization from saline-sodic irrigation water, 297
Watershed
use of caesium-137 to investigate soil erosion, 423
Wetlands
P adsorption in a constructed wetland soil, 97
Wheat
bootstage nutrient concentrations, 33
tillage, crop rotation and N fertilizer requirement, 165
Wheat production
manure and lime improve crop production on acid soil, 227
Wheat, spring
effect of fertility on soil C flux, 155
Wind erosion
wind erosion in milled peatlands, 85
